

## Autumn Ridge Shingle guidelines

Due to the increased number of Architectural Review requests for roof replacements, the Board of Directors would like to clarify our color standard. A replacement roof color should be consistent with the original color, "Weathered Wood", chosen by our neighborhood developer. To maintain the aesthetic appeal of the community, we do not plan to change the existing shingle color.

We understand that all shingle manufacturers do not use the same color descriptions. For this reason, all Architectural Review requests should include the color selection as well as the manufacturer (and shingle line if applicable). For example, we recently approved "Driftwood" from the Owens Corning Oakridge® Shingles line (Disclaimer: This is not an endorsement by the Board).
